Degree Pathways

In high school, I want to take as many classes as I can. I know that this will help when I go into a good college. I want to take advanced math such as Geometry, which I am taking this year, Algebra II, Pre-Calculus, and Calculus. This will help me in my career because I would like to be an owner of a business. Owning and managing my own business would require me to do a lot of math. If possible I would also love to take a finance class in high school to get started on the basics of owning and operating my own business. I plan on graduating with a Core 40 with Technical Honors. In college I want to get a Master's Degree in Business Administration. Getting started on these classes early in my educational career, would give me the advantage of getting ahead, so when I do start my college career, it will be easier for me. These are some of the reasons why I think my high school career helps me to get ahead in life, and doing this helps me later in my career.
